- Collaboration & Team-Based Design
- Communication (Verbal, Visual & Written)
- Time Management & Project Planning
- Adaptability

Certifications- coursera

- Adobe UX/UI
- Design Thinking for Innovation
- The Growth Mindset
- Innovation through Design: Think, Make, Repeat, Break
- Conflict Resolution Skills
- Generative AI: Prompt Engineering Basics
- OpenAI GPTs: Creating Your Own Custom AI Assistants
- Foundations of User Experience (UX) Design

About Me

I'm a user-centered designer passionate about translating deep research into purposeful digital and physical experiences whether it's toys that support emotional growth, intuitive UX flows, adaptable furniture systems, or products that address real human needs. My practice blends empathy, usability, and visual storytelling to create solutions that are both functional and emotionally resonant. I'm driven by curiosity, collaboration, and a belief that thoughtful design can create meaningful impact, and I'm eager to contribute to teams where research-led, human-centred design shapes the core of the product.

Internship Experience

May 2025- July 2025 | 3 months

Summer internship- Product Designer intern *Ariro Toys, Chennai*

- **Designed and prototyped a Montessori-inspired Neem Wood toy** for toddlers at Ariro Toys, integrating child-centred, eco-friendly principles with packaging, pricing, and photography to support early learning and sales goals.

May 2024- July 2024 | 3 months

Summer internship- Product Designer intern *Posspole, Bengaluru*

- Gained corporate and cross-functional project management experience, addressing operational challenges while building adaptability, problem-solving, and stakeholder coordination skills for effective delivery.

May 2023- July 2023 | 3 months

Summer internship- Teaching Assistant intern *TEACH FOR INDIA, Hyderabad*

- Developed leadership, adaptability, and research-driven problem-solving skills by addressing systemic challenges in the education sector and proposing actionable solutions for improved outcomes.

Industry Experience

May 2024- March 2025 | 11 months

Industry Project- Industrial Designer internship *Better By Design, Hyderabad*

- Led a hands-on innovation project at Better By Design (hosted at T-Works) to spark creative problem-solving in children.
- Designed and developed connector systems and cardboard-based components enabling open-ended construction and play.
- **Now scaled into manufactured kits for children.**
- Facilitated engaging, child-centred workshops that encouraged experimentation, collaboration, and design thinking skills.

Project Experience

March 2025- Apr 2025 | 2 months

Design project- Professor & Student team *Deloitte, Hyderabad*

- Explored the **future of phygital retail by creating detailed 1:100 scale dioramas of community-centered spaces**. Combined digital precision with physical craftsmanship to visualize interactive, sustainable, and inclusive retail environments.

Notable Projects

Feb 2024- May 2024

Simple Product Design - STEM *Learning TOY DESIGN for school*

- Designed a low-cost, durable learning aid for 3rd-4th grade EVS in under-resourced Telangana government schools, using tactile, twistable rings to teach animal biodiversity. Developed through field research in 10 schools, **user-tested at T-Works Vanguard 2025**, and adaptable for other topics to enhance peer learning and engagement.

Sep 2024- Dec 2024 (present)

RASA- Digital marketplace for Indian designers *UX/UI Design project*

- Developed Indian Design Marketplace, a digital platform showcasing and selling products by Indian designers across furniture, toys, fashion, accessories, and crafts etc. Designed for seamless product discovery, purchase, and delivery, celebrating India's design heritage. This is on of the **Bronze Award winner at UXINDIA 2025 and TOP25 in HP dream unlocked season 1 2025**.

Otc 2024- Nov 2024

Child centric- Furniture design *Furniture design x play design*

- Developed playful furniture named Pilaplay, a modular furniture system for kindergarten students, integrating Montessori and Reggio Emilia principles to foster creativity, problem-solving, and collaboration. Designed eight customisable pieces adaptable to diverse learning spaces, validated through research, observational studies, and user testing.

July 2025 - Present

Cooperative Play Experience for Children *MESH PLAY*

- Designing a cooperative play experience for children aged 6-12, grounded in the MESH (Mental, Emotional, Social Health) framework. Creating an inclusive, non-competitive game to foster emotional expression, empathy, collaboration, and coping skills, informed by child psychology research.

Feb 2025

Deccan Glow - Craft Innovation *Craft inspired product design*

- Designed Deccan Glow, a culturally rooted table lamp using eco-resilient Deccani wool, turned teak wood, and repurposed ceramic. Integrated tapestry weaving, wet felting, and needle felting techniques to create a sustainable, heritage-inspired product for mindful living.

Feb 2025

Biomimetic grain storage *Biomimicry*

- Developed a pinecone-inspired biomimetic grain storage system concept with adaptive scales that open in dry conditions for ventilation and close in humidity to prevent spoilage. Designed for sustainable, low-maintenance preservation using durable, non-porous materials.

Sep 2024- Dec 2024

Prosthetic Design *Universal Design*

- Designed an affordable, functional prosthetic leg for long-transfemoral amputees living below the poverty line, incorporating ankle movement to enhance mobility and enable the user to perform daily tasks.
