Hyderabad, India

Technical Skills

- Prototyping & Fabrication
- Fusion360
- SolidWorks & Rhino 3D
- KeyShot Rendering & CMF
- Figma
- Interaction Design & UI
- Concept Visualisation
- Unity (AR / VR Spatial)
- Adobe Photoshop, Illustrator
- Adobe InDesign
- Vizcom AI & Digital Sketching
- DFM / DFA & Tooling
- Ergonomics & Anthropometry
- Wood Joinery & Leathercraft

Soft Skills

- Critical & Analytical Thinking
- Collaboration & Team-Based Design
- User-Centred Design & Empathy
- Communication & Negotiation
- Time Management & Planning
- Adaptability

Certifications

- Principles of UI/UX Design
- User Experience Design
- Prompt Engineering & Generative AI
- Design Thinking for Innovation

About Me

I am an Industrial Designer driven by a maker's curiosity — exploring the space between abstract ideas and physical reality to build products people can hold, test, and rely on. Grounded in human-centered research, hands-on prototyping, and Design for Manufacturing (DFM/DFA), my work spans physical hardware, modular furniture, assistive biomechanics, and scalable digital design systems. I believe in putting concepts into the hands of users early, letting reality challenge every assumption, and designing with purpose, craftsmanship, and empathy.

Languages

- English - Fluent
- Hindi - Fluent
- Telugu - Fluent

Hobbies

- Boxing & Combat Sports
- Sketching & Prototyping
- Material & Leathercraft
- Hands-on Crafting
- Field Observation & Travel

Education

- **Bachelor of Design (B.Des Hons.) – Industrial Design** 2022 – 2026
Woxsen University, Hyderabad
CGPA: 3.0 / 4.0 · Specialization in Industrial Design, DFM, CMF & Physical Prototyping

Extracurricular Activities

- **Vice-President · Product Design Club** June 2024 – March 2025
Woxsen university
 - Led the annual campus Auto Expo featuring a rally race car engineering team, live design talks, and a motorcycle stunt show celebrating design and engineering.
 - "Sketch Café" — a recurring creative space fostering cross-disciplinary sketching, ideation, and collaborative prototyping between designers and engineers.
 - Mentored junior design students in workshop safety, 3D modeling, and rapid physical mockups.

📁 Internship Experience

- Jan 2026- July 2026 | 6 months
Product Designer intern
OiMake Makers, Hyderabad
 - Spearheaded end-to-end industrial design, DFM optimization, and retail packaging for **commercial STEAM ed-tech products launched on Amazon** (*DIY Light Backpack, Light-Up Fridge Magnet, LumoBug Mini Robot, Let's Go Football Game*).
 - Formulated production CAD for injection-molded plastic enclosures, snap-fit clearances, motorized gearboxes, and laser-cut wood assemblies.
 - User-tested with 50+ students (ages 8–14), translating feedback into tool-free mechanical assemblies and visual build guides.
- May 2025- July 2025 | 3 months
UX Engineering Analyst intern
Accenture, Bengaluru
 - Architected modular Data Visualization Design System with reusable components, Figma design tokens, and WCAG AA accessibility compliance.
 - Collaborated with agile engineering teams to prototype and deliver interactive, client-ready enterprise dashboard assets.
- May 2024- July 2024 | 3 months
Business Strategy Design intern
WhyLabs, Hyderabad
 - Gained hands-on DFM expertise, evaluating tooling economics, mold draft angles, and product manufacturability factors.
 - Analyzed business strategies to bridge industrial design execution, manufacturing cost feasibility, and commercial strategy.

⚙️ Notable Projects

- 2025 · Soft Goods & Craft
StrikeFly — Dedicated Boxing Carry
Bespoke Leather Craft
 - Pattern-drafted bespoke Moroccan goat leather bag tailored to 16oz sparring gloves, wide-mouth aperture mechanics, and dragonfly (*Anisoptera*) wing spine topstitching.
- 2023 · Academic Project
Yāyāvara — Flat-Pack Furniture
Tool-Free Nomadic Furniture System
 - Engineered 4-piece birch plywood furniture suite consolidating into a 120×80 cm bundle, assembling in under 5 minutes without tools via precision mortise-and-tenon slotting.
- 2024 · Mobility & System Design
Micro Mobility (Vras)
Campus Reverse-Trike Ecosystem
 - Developed on-demand reverse-trike scooter and induction docking ecosystem for campus transit, focusing on DFM frame manufacturability, RFID student access, and regenerative braking.

📁 Industry Experience

- 2024 · Research Publication & Field Study
Public Transport Ergonomics Field Study
Depot Ergonomics & Anthropometry
 - Executed physical bus measurements, 16-parameter anthropometric mapping, and REBA joint posture scoring across 100 TSRTC bus crew members at Zaheerabad Depot, formulating driver cockpit and entry step redesign standards.
- 2024 – 2025 · Assistive Hardware
Universal Design / Forequarter Prosthetic
Body-Powered Biomechanical Design
 - Engineered body-powered upper-limb prosthetic mechanism for high-level forequarter amputees. Developed novel mechanical transmission enabling versatile functional grip patterns without electronics.

👥 Project Experience

- 2025 · Computer Vision & UX
AlertEye — AI Driver Safety Companion
Computer Vision System
 - Built AI-based computer-vision system for real-time driver drowsiness monitoring using 850nm infrared tracking, multi-signal PERCLOS facial analysis, and 5-tier ambient alert escalation UX.
- 2023 – 2024 · Speculative Design
Vision 2080 — Speculative Living
Future Systems Design
 - Envisioned resilient floating city habitats using data-driven forecasting, speculative design frameworks, and sustainable oceanic infrastructure concepts.
- 2024 · Spatial Computing
AR/VR Interactive Application
Unity Spatial Visualization
 - Created interactive, mobile-ready augmented reality (AR) application in Unity using 3D models for immersive spatial design visualization.
